

# Imon Hosen: Information Engineering

## Journey

From Bangladesh to Germany, pursuing a B.Eng. in Information Engineering.

## Core Passion

Driven by the intersection of Software, Data, and Machine Machine Learning.

## Problem Solver

A hands-on approach to turning complex technology into real- into real-world solutions.

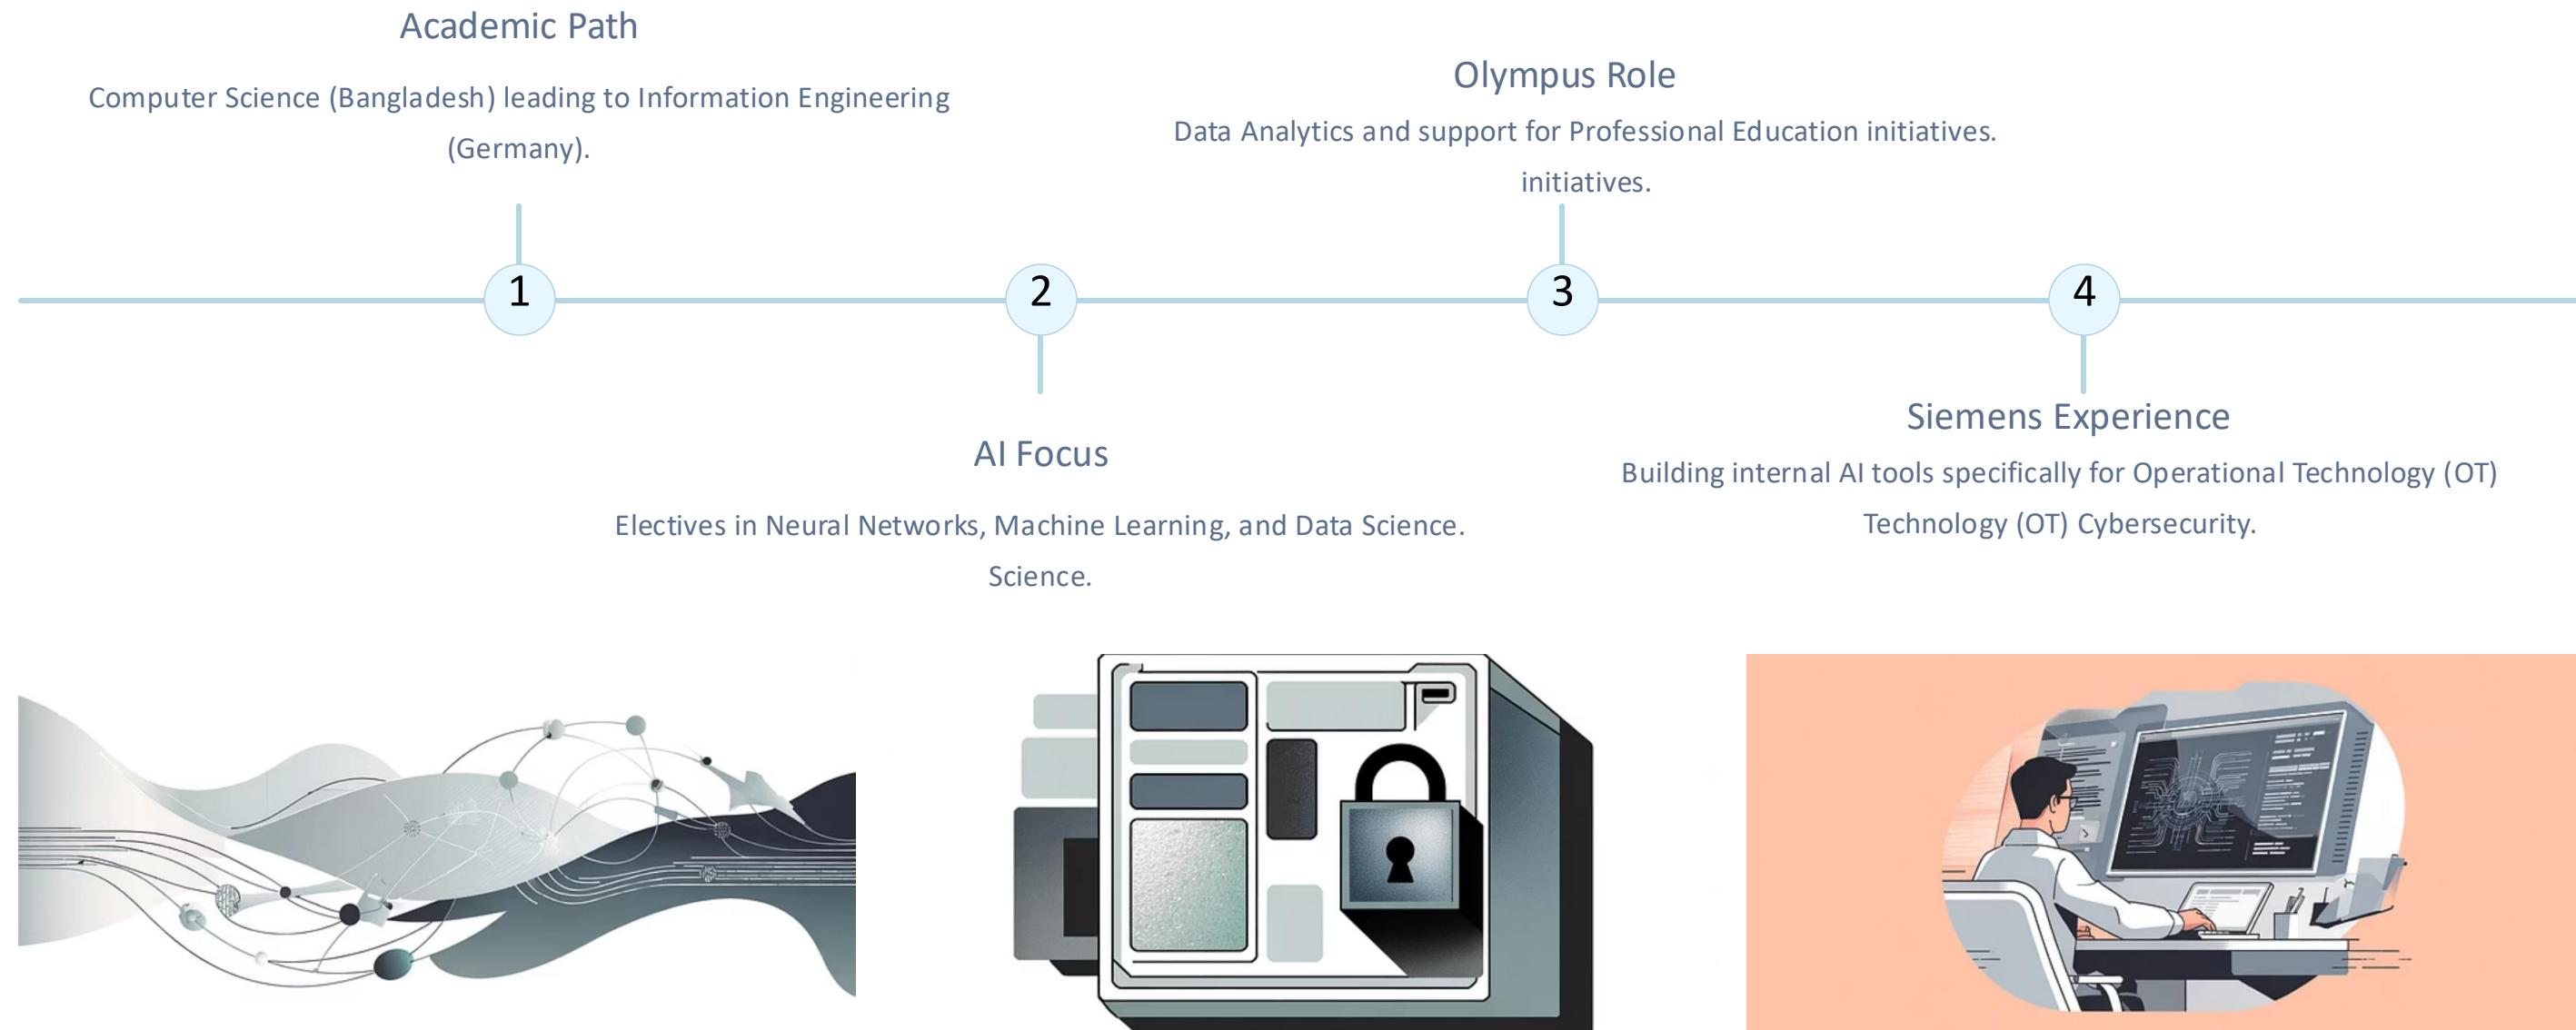

## Value Creation

Motivated to create value in both corporate and entrepreneurial settings.

# From CS to Cybersecurity AI -- my background

My academic and professional path is focused on translating advanced data concepts into high-impact business tools.

# The “Bicycle Principle” -- My Desire to Grow with START

“Life is like a bicycle — keep moving or fall.”

I embrace a growth mindset, constantly seeking movement and mastery through new challenges.

# Entrepreneurial talent

I possess the dual skillset of engineering precision and entrepreneurial execution.

## Action-First

Running a small business (T-shirts shirts & UI/UX design) in Bangladesh.

## Technical Depth

Proven AI tools development capabilities from my experience at experience at Siemens.

## Execution Focus

Ability to turn initial ideas into working, scalable solutions.

## Dual Skillset

Combining engineering precision with design and user experience insight.

My mindset is not just to code, but to **create, sell, and scale value**.
